EDUCATION

University of Virginia | Charlottesville, VA *Expected May 2027*
Bachelor of Arts in Economics and Computer Science GPA: 3.58/4.00
Relevant Coursework: Econometrics, Intermediate Microeconomics, Intermediate Macroeconomics, Financial Markets, Probability & Statistics, Data Structures & Algorithms, Business Analytics, Data Visualization

RESEARCH EXPERIENCE

Kids at Risk Action (KARA) | Minneapolis, MN *Jun 2026 – Aug 2026*
Research & Policy Analyst Intern
- Quantified Minnesota's annual cost of child-welfare inaction at $4.2 billion by hand-coding ACE exposure in a de-identified 20-year case panel in Python and applying CDC lifetime-cost estimates.
- Benchmarked prevention spending against WSIPP benefit-cost ratios; documented assumptions in Python and Excel.
- Authored a state appropriations policy paper and 6 short-form briefing videos for Minnesota legislators.

University of Virginia | Charlottesville, VA *Jan 2026 – May 2026*
Research Assistant
- Showed fast-food density does not robustly predict preventable ED visits once income is controlled ($p = 0.24$); median household income was the strongest predictor ($p = 0.004$) across 62 NY counties.
- Built a 372-observation county-year panel in Stata from NY SPARCS, USDA Food Atlas and Census ACS data via a HUD ZIP-to-county crosswalk; ran pooled OLS with clustered errors and VIF tests.

PROFESSIONAL EXPERIENCE

Cita Reservations | Chicago, IL *Jun 2024 – Aug 2024*
Data Analyst Intern
- Raised customer engagement 4% by building Python models that score each customer's repeat-booking likelihood.
- Analyzed 250,000+ booking records in Excel and BI tools; cancellation findings reshaped reminder timing.

Virginia Consulting Group | Charlottesville, VA *Sep 2023 – Sep 2025*
Analyst
- Sized markets and mapped competitors for 3 small-business clients across semester-long engagements.
- Named Featured Presenter (2024) at the client showcase after presenting recommendations to client leadership.

INDEPENDENT RESEARCH & PROJECTS

Medicaid Expansion and Job Lock | Working paper & policy memo, R
- Found ACA Medicaid expansion raised low-income adults' coverage 13.3 pp and cut uninsurance 9.9 pp with no change in work or job mobility (Callaway–Sant'Anna DiD; 191,112 CPS-ASEC records, 40 states).
- Showed the usual base year understates coverage gains by 25%+ and yields a spurious 3.3 pp employment effect.

peffects | Python, NumPy, SciPy
- Reproduced 37 of 37 published values across 3 replication studies by implementing TWFE, Goodman-Bacon, Callaway–Sant'Anna, Sun–Abraham, synthetic control and wild cluster bootstrap from the papers.
- Found stand-your-ground laws raised homicides ~8%; wild-bootstrap p (0.055) doubles the cluster-robust p (0.027).

forecast-audit | Python, pandas, SciPy
- Audited 3.1 million FiveThirtyEight forecasts; found election models underconfident (calibration slope 1.36).

SportsBetter | Python, LightGBM, SciPy, Flask
- Sized stakes with a correlation-aware fractional-Kelly optimizer on calibrated LightGBM win probabilities.
- Raised test coverage from 16% to 93% (91 tests); plugin architecture adds a new sport in about 100 lines.

TECHNICAL SKILLS & ACTIVITIES

Languages: Python, R, Stata, SQL, TypeScript, LaTeX
Libraries & Tools: pandas, NumPy, SciPy, LightGBM, Flask, pytest, Git, GitHub Actions, Excel, Tableau, Jupyter
Methods: Causal inference (DiD, synthetic control), econometrics, Monte Carlo, cost-benefit analysis, machine learning
Activities: Economics Club; Student Asian Software Engineers (SASE); TheCourseForum; Club Tennis
